

International Agribusiness:

A Joint M.S. Degree

North Dakota State University

and

l'École Supérieure d'Agriculture d'Angers

Billions of dollars worth of food and farm products are traded each year on international markets. Food companies based in Europe and North America scour the globe for customers and suppliers. Policy makers actively promote expanded markets for their country's food producers. Global food and agricultural policies command intense debate in world trade forums. International agribusiness can be an exciting and rewarding career!

Entering the world of international agribusiness requires not only a solid educational foundation, but one must also be comfortable with a variety of cultures, have international experience, and demonstrate mastery of foreign languages.

The International Agribusiness M.S. program offered by the Department of Agribusiness and Applied Economics at North Dakota State University and l'École Supérieure d'Agriculture (ESA), a French university in Angers specializing in agribusiness, provides both the academic training and the international experience required to excel in an international agribusiness career.

Students from both NDSU and from ESA will spend a minimum of two semesters at NDSU and one semester in Angers, France. In addition to courses in applied economics and agribusiness, students will attend French classes, participate in an intensive language course in Angers during the summer, and gain international work experience in Europe.

At the end of the program, students receive Master of Science degrees from both NDSU and from ESA.

Admittance:

Students must satisfy graduate school admittance requirements at NDSU.

NDSU requirements and application materials:

<http://www.ndsu.edu/gradschool/>

Program Costs:

This is an exchange program. Students will pay NDSU tuition and fees. Additional program costs, such as travel, room and board, intensive foreign language programs, and incidental expenses, will be borne by the students. It is anticipated that student internships will be paid positions similar to existing internship programs available for NDSU students.
