Position Description

David J. Nolan Directorship

Charles H. Dyson School of Applied Economics and Management

College of Agriculture and Life Sciences - Cornell University

Cornell is a community of scholars, known for intellectual rigor and engaged in deep and broad research, teaching tomorrow's thought leaders to think otherwise, care for others, and create and disseminate knowledge with a public purpose.

The Charles H. Dyson School of Applied Economics and Management is accepting applications for the position of the David J. Nolan Director and Professor of Applied Economics and Management. The Director will have an extraordinary opportunity to lead this internationally recognized School, known for its unique combination of research, education, extension and outreach that inform and foster the

public stewardship and private management of businesses, organizations, livelihoods, and natural resources.

The Dyson School is distinguished by its top-ten-ranked AACSB-accredited undergraduate business program, its top-ten-ranked graduate program in applied economics, and its distinguished faculty who are recognized global leaders in their academic fields. Uniquely situated within the College of Agriculture and Life Sciences, the continued success of the Dyson School depends on the synergy of its diverse program areas: food and agricultural economics, management, environmental and resource economics, and international and development economics.

The Dyson School has 50 faculty members and more than 50 professional and administrative staff. It is one of the largest academic units at Cornell University and provides undergraduate education to 700 majors and graduate education to 100 Master's of science and doctoral students. In addition, the School educates a wide range of stakeholders through its extension and outreach activities.

The Dyson School is housed in historic Warren Hall which is currently being remodeled as a LEED-certified state-of-the-art building with new classrooms and study areas for students, as well as completely renovated faculty and staff offices.

The Director will be responsible for the overall leadership and administration of the School. The Director will oversee and collaborate with the administrative core, including the Director of Undergraduate Studies, the Director of Graduate Studies, the Director of Extension, and an executive committee with representative heads of the four intellectual foundations of the School. This team will lead strategic planning and implement a well-defined and clearly articulated vision, reflecting a cohesive portfolio of academic programs, fiscal and operations/facilities management, personnel, and external relations. The Director will serve as the principal voice in faculty governance and faculty and staff performance evaluation. The Director will provide fiscal oversight for the School, including responsibility for disbursing proceeds from the endowment. The Director is expected to foster collaborative engagements with CALS career services, alumni and development efforts, corporate and foundation relations, and communications/marketing initiatives, and to provide leadership in other areas such as space and facilities planning and allocation. Further, the Director must foster strong ties with external clientele affiliated with each of the Dyson School's four key areas of food and agricultural economics, management, environmental and resource economics, and international and development economics.

The Director reports to the Dean of the College of Agriculture and Life Sciences at Cornell University, and will work with other academic units to coordinate and ensure the success of management, economics, agriculture, and public policy oriented programs across the campus.

The Director's administrative responsibilities extend throughout the calendar year. The academic appointment as Professor is a nine-month position. The Director normally serves a negotiated (3 or 5 year) renewable term. Upon completion of the Directorship, the successful candidate is expected to remain on the faculty of the Dyson School.

Qualifications: The Director must have a distinguished record of scholarship, strong leadership skills, demonstrated administrative ability, a dynamic management style, the capacity to integrate diverse interests and forge a common vision, and enthusiasm to match the energy of highly motivated students, faculty members, staff professionals, and accomplished alumni from around the globe. The Director is expected to be an economist with a Ph.D. in the field of economics or applied economics, public policy, or management, and to be qualified to hold a tenured academic position at Cornell University at the full professor level.

Application: Questions regarding the position should be directed to Professor Max J. Pfeffer, Senior Associate Dean of the College of Agriculture and Life Sciences, Cornell University (mjp5@cornell.edu). Applicants should submit their letter of application detailing qualifications for the position, curriculum vitae, and names and addresses of three references via Academic Jobs Online at <https://academicjobsonline.org/ajo/jobs/2560>. Review of applications will begin March 29, 2013 and will continue until the position is filled.

Cornell University is an innovative Ivy League university and a great place to work. Our inclusive community of scholars, students and staff impart an uncommon sense of larger purpose and contribute creative ideas to further the university's mission of teaching, discovery and engagement. Located in Ithaca, NY, Cornell's far-flung global presence includes the medical college's campuses on the Upper East Side of Manhattan and Doha, Qatar, as well as the new CornellNYC Tech campus to be built on Roosevelt Island in the heart of New York City.

Diversity and inclusion have been and continue to be a part of our heritage.

Cornell University is a recognized EEO/AA employer and educator.
