### **Position Description**

The West Virginia State University Research and Development Corporation, invites qualified applicants to apply for the full time position of Research Associate.

This position is supported from a NIFA-USDA funded grant for developing disease resistant pepper cultivars with improved nutrition values using the latest high-throughput molecular technologies. The primary duties of the Research Associate will be to assist in conducting research related to pepper genomics and genetics. The Research Associate will be required to proficiently handle standard laboratory, greenhouse, and field procedures, as well as, maintain a safe working environment. This position requires the ability and willingness to assist the scientists and other under-graduates working on this project and conduct independent research.
