#### ***Registration***

The Purdue University [Center for Food and Agricultural Business](#) will host the [National Conference for Food and Agribusiness](#) November 6–7, 2019 on the university's West Lafayette, IN campus. Take advantage of the opportunity to gain beneficial, relevant industry information and network with professionals from all facets of the agri–food system.

#### **About the conference:**

Purdue faculty will release detailed results and insights from recent farmer and non–farmer research studies. The studies were conducted to obtain input from each segment of the food and agricultural business value chain on the extent to which their organizations are collecting and using data.

Results from the farmer survey will cover the types of data producers collect, the tools used to manage and analyze data, the decisions driven by data, and their assessment of data driven decisions. A panel of data savvy growers will also share their experiences implementing data into their operations. Non–farmer survey findings will focus on the collection of data at each value chain segment, how they use it and the impact it has. Faculty will discuss how data is used to drive decision making in organization as well as help customers to improve their decision making.

### **Panel Study of Income Dynamics**

#### ***Request for Proposals***

The University of Kentucky Center for Poverty Research, in conjunction with the United States Department of Agriculture's Economic Research Service and the Food and Nutrition Service, announces a new [Request for Proposals](#) for food insecurity research using the Panel Study of Income Dynamics (PSID). Research funded competitively under this announcement will focus on economic analyses of longitudinal household food insecurity and its links to food assistance program participation, work, income, consumption, and wealth. It is anticipated that five (5) grants at \$50,000 each will be awarded.

The PSID began in 1968 as a survey of 4,800 American families and has since followed the children and grandchildren of original respondents. Today there are more than 11,000 PSID families and 26,000 individuals who participate in the survey. The USDA provided funding to include the 18–item Household Food Security Module on the 1999, 2001, and 2003 PSID main family surveys, as well as the 1997 Child Development Supplement (CDS). Food Security Module questions were also included on the 2014 CDS and on the 2015 and 2017 main family surveys.

The aim of this grant initiative is to expand upon the first round of PSID grants (see <http://ukcpr.org/research/food-assistance-food-insecurity/psid>) by competitively awarding cutting–edge

longitudinal research on causal links between food insecurity and child, adult, and family well-being across the domains of income, employment, consumption, wealth, and family structure utilizing both the historical, and especially, the newly released 2015 and 2017 data on food insecurity in the PSID.

Prospective researchers are encouraged to submit a letter of intent to UKCPR by Oct. 10, 2019, with full proposals due Nov. 14, 2019, by 5 p.m. For details on submission, see the full request for proposals [here](#). Interested researchers may also contact UKCPR Assistant Director Jeff Spradling at [ukcpr@uky.edu](mailto:ukcpr@uky.edu) or 859-257-7641 for more information.
